### OBJECTIVE

**Short-term Goal:** Seeking a Frontend Developer position where I can contribute my expertise in HTML, CSS, JavaScript, and React to build engaging and responsive user interfaces. Eager to collaborate with a dynamic team and continuously refine my skills through real-world development challenges..

**Long-term Goal:** Grow into a professional Frontend Developer, building better user experiences through constant learning.

### PROJECT

#### Online Movie tickets

(Personal project)

JUL 2023 - SEP 2023

**Role:** Backend Developer, Tester

**Technologies:** Laravel, Bootstrap, PHP | Vue, Axios, jQuery

GitHub: [github.com/HungDang48/MovieFlix](https://github.com/HungDang48/MovieFlix)

##### Description:

- A web-based platform for browsing movies, selecting seats, and booking tickets online. Includes secure authentication, payment integration, and an admin dashboard for managing content.

##### Key Contributions:

- Developed scalable backend with authentication, CRUD, and payment integration.
- Optimized APIs for real-time seat updates and secure transactions.
- Built admin panel for managing movies, schedules, tickets, and user roles.
- Improved UX with real-time ticket access and movie filtering by genre.

#### CLOTHES ECOMMERCE

(Personal project)

SEP 2024 - DEC 2024

**Role:** Frontend Developer, Designer, Tester

**Technologies:** React, TypeScript, Redux, Axios | Node.js, JSON Server

GitHub:

**Front-end:** <https://github.com/HungDang48/Shopping-Well.git>

**API JSON:** <https://github.com/HungDang48/Shopping-Well-Back-end.git>

##### Description:

- A e-commerce platform featuring product browsing, cart management, and order handling. Includes an admin panel with full CRUD functionality for managing users, products, categories, and orders.

##### Key Contributions:

- Built admin dashboard with login and CRUD features.
- Designed intuitive UI/UX for user auth and cart management.
- Integrated RESTful APIs for seamless frontend-backend communication.
- Ensured responsive design and efficient state handling with Redux.
